

HISTORIC MIRAMAR INFRASTRUCTURE IMPROVEMENTS PROJECT (HMII3) Newsletter

September 23, 2019 Vol. 26

The HMII3 Project Team is managing the Historic Miramar Infrastructure Improvements Project Phase 3 (HMII3). The intent of this project is to update the 1950's era water mains, construct new storm drains and swales, and enhance fire protection with additional fire hydrants. It will also provide sanitary sewer services that will allow property owners to abandon their septic tanks once connected to the new sewer system. This project is also aimed at improving stormwater drainage in your neighborhood..

Currently, restoration is the focal point of the HMII3 project. Phase two of restoration will begin Monday, September 23, 2019 in the areas between SW 18th Street to SW 24th Street between SW 66th Avenue to SW 64th Avenue.

Restoration on Pembroke Road continues between SW 66th Avenue and SW 65th Avenue beginning on Sunday, September 22, 2019 at 9:00 pm through September 25, 2019, weather permitting. To maintain the flow of traffic on Pembroke Road, the restoration construction schedule will consist of a one night shift from 9pm to 5am on Sunday, September 22 followed by two day shifts beginning Monday, September 23, 2019 from 9am to 4pm for the rest of the week. The contractor Reynolds Construction, Inc. will provide and maintain access to all driveways during restoration. Reynolds construction is primarily focused on completing the construction of the storm drainage system and the various elements of restoration.

The City of Miramar recently launched the HMII3 Interactive Map. The map allows you to follow the HMII3 construction activity in your area. The link below provides updates and progress status.
